

### PROFESSIONAL SUMMARY

Recent graduate with a degree in Computer Engineering and over 3 years of experience in designing and developing web and mobile applications through internships and personal projects. Proficient in both front-end and back-end technologies, including React, React Native, Node.js, Redux, and MySQL. Strong background in working with RESTful APIs, OAuth 2.0, GPT API, MVC architecture, cloud services, and JSON Web Tokens (JWT). Proven ability to deliver high-quality solutions, enhance system performance, and build scalable applications

### TECHNICAL SKILLS

- Front-End: HTML, CSS, JavaScript, Java OOP ,TypeScript, React, React Native, Redux, Next.js, Tailwind, Bootstrap, Ant Design
- Back-End: Node.js, Express, GraphQL, RESTful APIs, JSON Web Tokens (JWT), OAuth 2.0
- Databases: MongoDB, MySQL, GraphQL, Stored Procedure, Redis
- DevOps & Tools: Git, GitLab, Docker, Postman, AWS Cloud
- CMS & Design: WordPress, Figma

### EDUCATION

**Bachelor of Engineering in Computer Engineering** 2020 - 2023  
Suan Sunandha Rajabhat University, GPA 2.80

### EXPERIENCE

**Academic Projects** 2022 - 2023  
Web Application Development Project  
Suan Sunandha Rajabhat University

- Developed MVC-based web applications for better code management.
- Designed user-friendly interfaces using Figma.
- Built RESTful APIs with Node.js and MySQL, utilizing Stored Procedures for performance optimization.
- Designed relational databases to meet project needs.
- Improved system performance through bug fixes and optimizations.

**Full-Stack Developer Intern** December 2023 - March 2024  
EdVISORY, Bangkok

- Developed Headless CMS web applications utilizing Next.js to fetch data from WordPress and display it.
- Technologies involved included Next.js, TypeScript, Tailwind, Redux, WordPress, and GraphQL.
- Gained experience in CI/CD systems and version control using GitLab.
- Applied these skills to streamline development processes and improve application performance.

**Personal Projects** 2025  
Cross-Platform Mobile App Development

- Developed a React Native app for Android & iOS, integrating the GPT API for AI-powered features.
- Designed and prototyped the UI/UX using Figma.
- Built a Node.js backend with Redis caching and MySQL for efficient data management.
- Integrated FastAPI for high-performance API handling and Remove.bg for automated background removal.
