PROFESSIONAL SUMMARY

Recent graduate with a degree in Computer Engineering and over 2 years of experience in designing and developing web applications through internships and projects. Proficient in both front-end and back-end technologies, including React, Node.js, Redux, and MySQL. Strong background in working with RESTful APIs, MVC architecture, cloud services, and JSON Web Tokens (JWT). Proven ability to deliver high-quality solutions and enhance system performance.

TECHNICAL SKILLS

- Front-End: HTML, CSS, JavaScript, TypeScript, React, Redux, Next.js, Tailwind, Bootstrap, Ant Design
- Back-End: Node.js, Express, GraphQL, RESTful APIs, JSON Web Tokens (JWT), Java OOP
- Databases: MongoDB, MySQL, Stored Procedure
- DevOps & Tools: Git, GitLab, Docker, Postman
- CMS & Design: WordPress, Figma

EDUCATION

Bachelor of Engineering in Computer Engineering **2020 - 2023**
Suan Sunandha Rajabhat University, GPA 2.80

EXPERIENCE

Full-Stack Developer Intern **December 2023 - March 2024**
EdVISORY, Bangkok

- Developed Headless CMS web applications utilizing Next.js to fetch data from WordPress and display it.
- Technologies involved included Next.js, TypeScript, Tailwind, Redux, WordPress, and GraphQL.
- Gained experience in CI/CD systems and version control using GitLab.
- Applied these skills to streamline development processes and improve application performance.

Academic Projects **2022 - 2023**
Web Application Development Project
Suan Sunandha Rajabhat University

- Web Application Development (MVC): Developed web applications following the MVC architecture, streamlining code management and maintenance.
- Web Application Design with Figma: Designed and developed web applications using Figma to create user-friendly and visually appealing interfaces.
- RESTful API Development with Node.js: Designed and developed RESTful APIs using Node.js, integrated with a MySQL database, and utilized Stored Procedures to enhance system performance and functionality.
- Relational and NoSQL Database Design: Designed both relational and NoSQL databases to accommodate project requirements.
- Bug Fixing and Performance Improvement: Identified and resolved issues, contributing to system performance enhancements.
